## ROLLING CHANGE

# DISCOVER THE NEW DUOFIX

FOR ANY INSTALLATION SITUATION

- 1 PULL-OUT SIDE FASTENING PLATE**  
Pull-out side fastening on the upper frame end for mounting on vertical studs for room-height applications.
- 2 ALTERNATIVE POSITION FOR WALL ANCHORS**  
An additional fastening hole for wall anchors to adjust their position to suit the structural conditions, e.g. in the case of obstacles or cables behind the wall.
- 3 SUITABLE FOR 25CM HIGH FLOOR CONSTRUCTION**  
Extendible leg supports with a larger adjustable range for floor constructions up to 25cm.
- 4 CLEVER FOOT PLATE DESIGN**  
Thanks to a hollow space, the foot plate can also be mounted above the fastening screws on the floor profile without the screw head getting in the way.
- 5 SUITABLE FOR WC UP TO 70CM**  
The optimised frame geometry enables the stable mounting of all kinds of wall-hung WCs with a projection of up to 70cm.

### CO<sub>2</sub> REDUCTION

Thanks to a sophisticated design, the deployment of less material and the use of green electricity in production, each new Duofix element for wall-hung WCs causes 10% fewer CO<sub>2</sub> emissions compared to its predecessor.

### EASY HANDLING

- 6 TURN-TO-FIX WALL ANCHOR**  
Geberit Duofix system wall anchor is very easy to screw in, requiring minimal effort.
- 7 PANELLING SUPPORT BETWEEN THE ELEMENTS**  
System rails between the Duofix elements offer support for cladding panels. Additional holes in the system fastening bracket and Duofix frame allow for easy fastening.
- 8 SIMPLE CLICK-IN FOOT PLATE**  
The Duofix element can be clicked in to the floor profile of the Duofix system with a single hand movement.

- 9 ADDITIONAL MARKINGS**  
Markings on the blue frame make measuring easier for the centre of the threaded rod and middle of the connection bend.
- 10 SCREWS WITH HEXALOBULAR SOCKET**  
Screws with an additional hexalobular socket (TX) offer an additional choice of tool when working with a cordless screwdriver.
- 11 SIMPLY ADJUSTABLE PIPE BRACKET**  
The pipe bracket can be easily adjusted to suit the position of the connection bend by sliding to ensure tension-free installation of the connection bend.
- 12 EASY-TO-INSTALL FOOT EXTENSIONS**  
New foot extensions which are simply mounted on the existing leg supports. These therefore no longer have to be disposed of.

GEBERIT DUOFIX SYSTEM

AVAILABLE 1<sup>ST</sup> MAY

GEBERIT DUOFIX ALPHA INSTALLATION SYSTEMS

# AFFORDABILITY, QUALITY AND SIMPLICITY

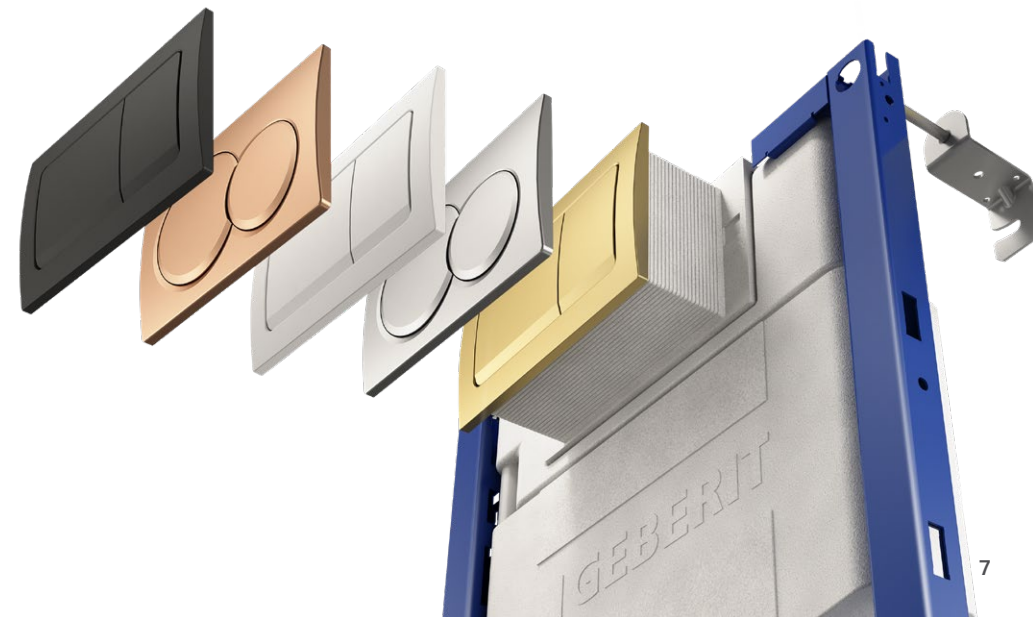

Introducing the brand new, entry level Geberit DuoFix range in the form of Alpha.

Offering the same quality, reliability and efficiency as standard from Geberit, this new range offers affordability and simplicity at its core - Alpha allows you to deliver affordable bathroom designs without compromise on quality.

- Available in Square and Round button styles
- Enhanced range of flush plate on trend colours including White, Gloss Chrome, Matt Chrome, Matt Black, Black Chrome, Red Gold and Brass
- Available in 3 heights (82cm, 98cm and 112cm)
- No compromise on quality and design moving from Delta/ Kappa to Alpha

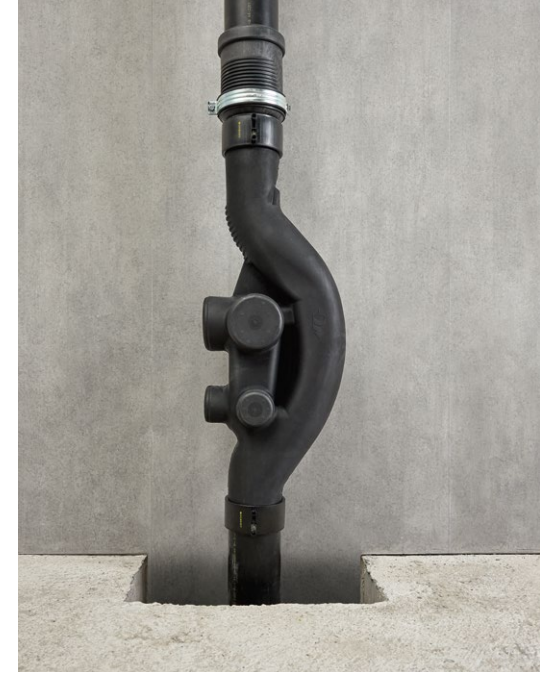

AVAILABLE NOW

GEBERIT SILENT DB-20 SUPERTUBE SYSTEM

# A QUIETER SUPERTUBE

The SuperTube drainage system for high-rise buildings is now also available for the Geberit Silent-db20 system. It is just as space-saving as the PE system, and is now also highly sound-insulating.

## THREE FITTINGS FOR THE SUPERTUBE EFFECT

### Geberit Silent-db20 Sovent

The fitting causes the incoming waste water from the floor to rotate in the stack, pressing it against the pipe wall. A stable column of air is created that enables a high drainage capacity.

### Geberit Silent-db20 BottomTurn

If there is a change in pipe direction, this bend converts the water from an annular flow into a layered flow without any interruptions. This redirection reduces the impulse loss significantly compared to conventional systems.

### Geberit Silent-db20 BackFlip

This bend has a twisted design and converts the layered flow back into a swirling annular flow. This means the column of air in the stack is maintained.

GEBERIT SIGMA01 FLUSH PLATES

# MORE CHOICE FOR ENTRY LEVEL BATHROOMS

The improved Sigma01 range now features a square flush plate that is a sleek, yet functional addition to modern bathrooms.

Crafted from high-quality molded plastic, it offers durability and ease of maintenance. This flush plate features a water-saving dual-flush system, allowing users to choose between a full or reduced flush to conserve water. It is available in four distinct finishes, including White, Black, Chrome and Black Chrome, providing versatility to match various bathroom aesthetics.

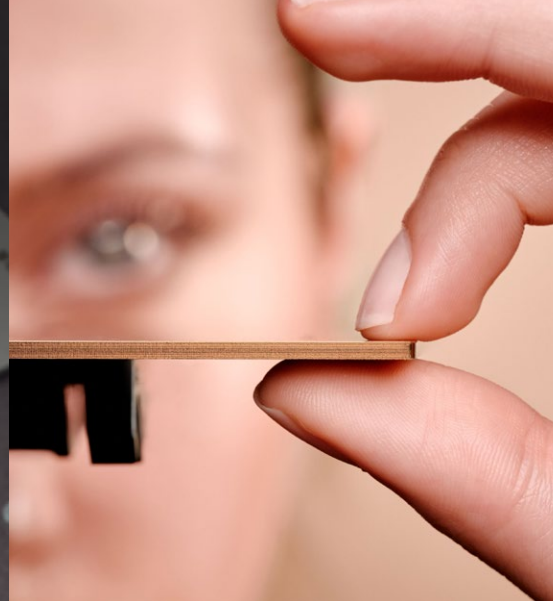

- Available in White, Black, Chrome and Black Chrome
- Made from high-quality moulded plastic

AVAILABLE NOW

GEBERIT SIGMA40 FLUSH PLATES

# OUR SLIMMEST FLUSH PLATE YET

A new, exceptionally slim flush plate in panoramic format is hitting the market in the form of the Sigma40. Measuring just four millimetres in depth, it is slimmer, wider and shorter than a standard flush plate.

In addition to its minimalist, modern look, the Sigma40 offers a variety of design options. Both square and round versions are available in a choice of materials, from brushed stainless steel through to glass finishes and coated steel.

- Slim design, only 4mm depth (All glass flush plates are 6mm)
- New 'widescreen' format
- Premium material and colour offering
- Available in Square and Round button styles

Colours available; Glass White, Glass Black, Glass Lava, Glass Sand Grey, Stainless Steel, Stainless Steel Red Gold, Stainless Steel Black Chrome, Stainless Steel Brass, Stainless Steel White Painted and Stainless steel Black Painted.
