# EXPERTISE AND QUALITY YOU CAN TRUST

GEBERIT IS A EUROPEAN MARKET LEADER IN THE FIELD OF SANITARY PRODUCTS, PROVIDING OUTSTANDING ADDED VALUE IN SANITARY TECHNOLOGY AND BATHROOM PRODUCTS.

Geberit is a global ambassador for quality with sales offices in over 50 countries. There are 29 production sites worldwide, with headquarters in Rapperswil-Jona, Switzerland, where Caspar Melchior Albert Geberit founded the company in 1874.

Over 12,000 employees are committed to providing customers with innovative, sustainable and durable products of the highest quality. We pride ourselves on our strong competence for innovation, enabled and supported by the Group's wide-ranging research and development activities. Customers can rest assured that new products meet their needs – not to mention the very highest quality standards with over 60 Years of concealed cisterns since 1964.

# THE PERFECT PARTNER FOR YOUR NEXT PROJECT

## GEBERIT VALUES

### KNOW-HOW

We bring over 150 years of experience to every new bathroom with every feature carefully crafted and designed to simplify the installation process and optimise performance.

### INNOVATION

With unrivalled behind the wall technology and inspirational new ceramics, we offer the complete bathroom solution - the perfect balance of elegant design and outstanding function.

### PARTNERSHIP

We work closely with our partners across every service and development. From industry-leading logistical support to training and technical support to product development, delivery and availability.

### RELIABILITY

Our total focus on performance means our products combine safety and durability with ease of installation. In the endurance testing labs, cisterns, filling valves, shower toilets, flush plates and taps are subjected to computer controlled lifecycle testing.

### QUALITY OF LIFE

From Rimfree® technology and stylish flush plates to exceptional water economy, we make life easier, more comfortable and more liveable.

# THE TRADITION OF HIDING CONCEALED CISTERNS

In solid and drywall construction, the Geberit concealed cistern is the heart of more than 70 million concealed installations in the bathroom or toilet. Every detail of this product is ingenious and has been proven a million times over. Plumbers and end users have trusted the one-piece leak-proof cisterns from Geberit for more than 60 years.

## EVENTFUL HISTORY

Geberit has more than 60 years experience in the field of concealed cisterns. Since 1964 Geberit is working on product improvement and has constantly developed the quality and functionality of the cisterns.

## TRIED AND TRUSTED

The Geberit concealed cisterns have been installed worldwide, more than 70 million times.

## BEAUTIFUL DESIGN

A concealed solution and beautiful flush plates offers a lot of design options for your bathroom.

## INNOVATIVE AND FUNCTIONAL DESIGN

Actuator plates are available in an easy-to-clean coated option, in a screwable version and almost all Sigma flush plates can be combined with Geberit DuoFresh, our odour extraction unit.

## WITHSTANDING HEAVY LOAD

The Geberit Duofix frame solutions are designed and tested to withstand loads of 400KG.

## SAVING WATER

The water consumption can be sustainably reduced with a Geberit dual flush actuation for the toilet.

## OPENING SPACE

As soon as the sanitary technology hides behind the wall, a new feeling of space is created.

## EASY TO CLEAN

The fewer edges, joints and corners, the simpler to clean and more hygienic.

## PREMIUM QUALITY

All products from Geberit are known for their very high reliability and durability. Proven Swiss technology for decades.

## LEAKPROOF

Every single cistern one-piece blow-mould and is tested on its leak-tightness before it is leaving the factory.

## 50 YEARS SPARE PARTS AVAILABILITY

50 years spare parts availability for Geberit Sigma and Omega.

## 25 YEARS SPARE PARTS AVAILABILITY

25 years spare parts availability for Geberit Alpha.

## DIGITAL SUPPORT

Easy planning with Geberit BIM data and ProPlanner. Recognising older products with the Pro App and directly ordering spare parts.

## INSTALLATION SYSTEMS

Available for all Geberit Duofix installation systems.

## ELECTRIC CONNECTION

The cisterns are prepared for a hidden or visible electric connection in case you want to upgrade your toilet.

## GEBERIT AQUACLEAN SHOWER TOILETS

Perfectly prepared for the installation of Geberit shower toilets with innovative comfort functions.

## PERFORMANCE FLUSHING

Optimised with Turbo Flush for a perfect wash-out of Geberit toilet ceramics, with water-saving flushing.

# EVOLUTION TIMELINE OF THE BATHROOM

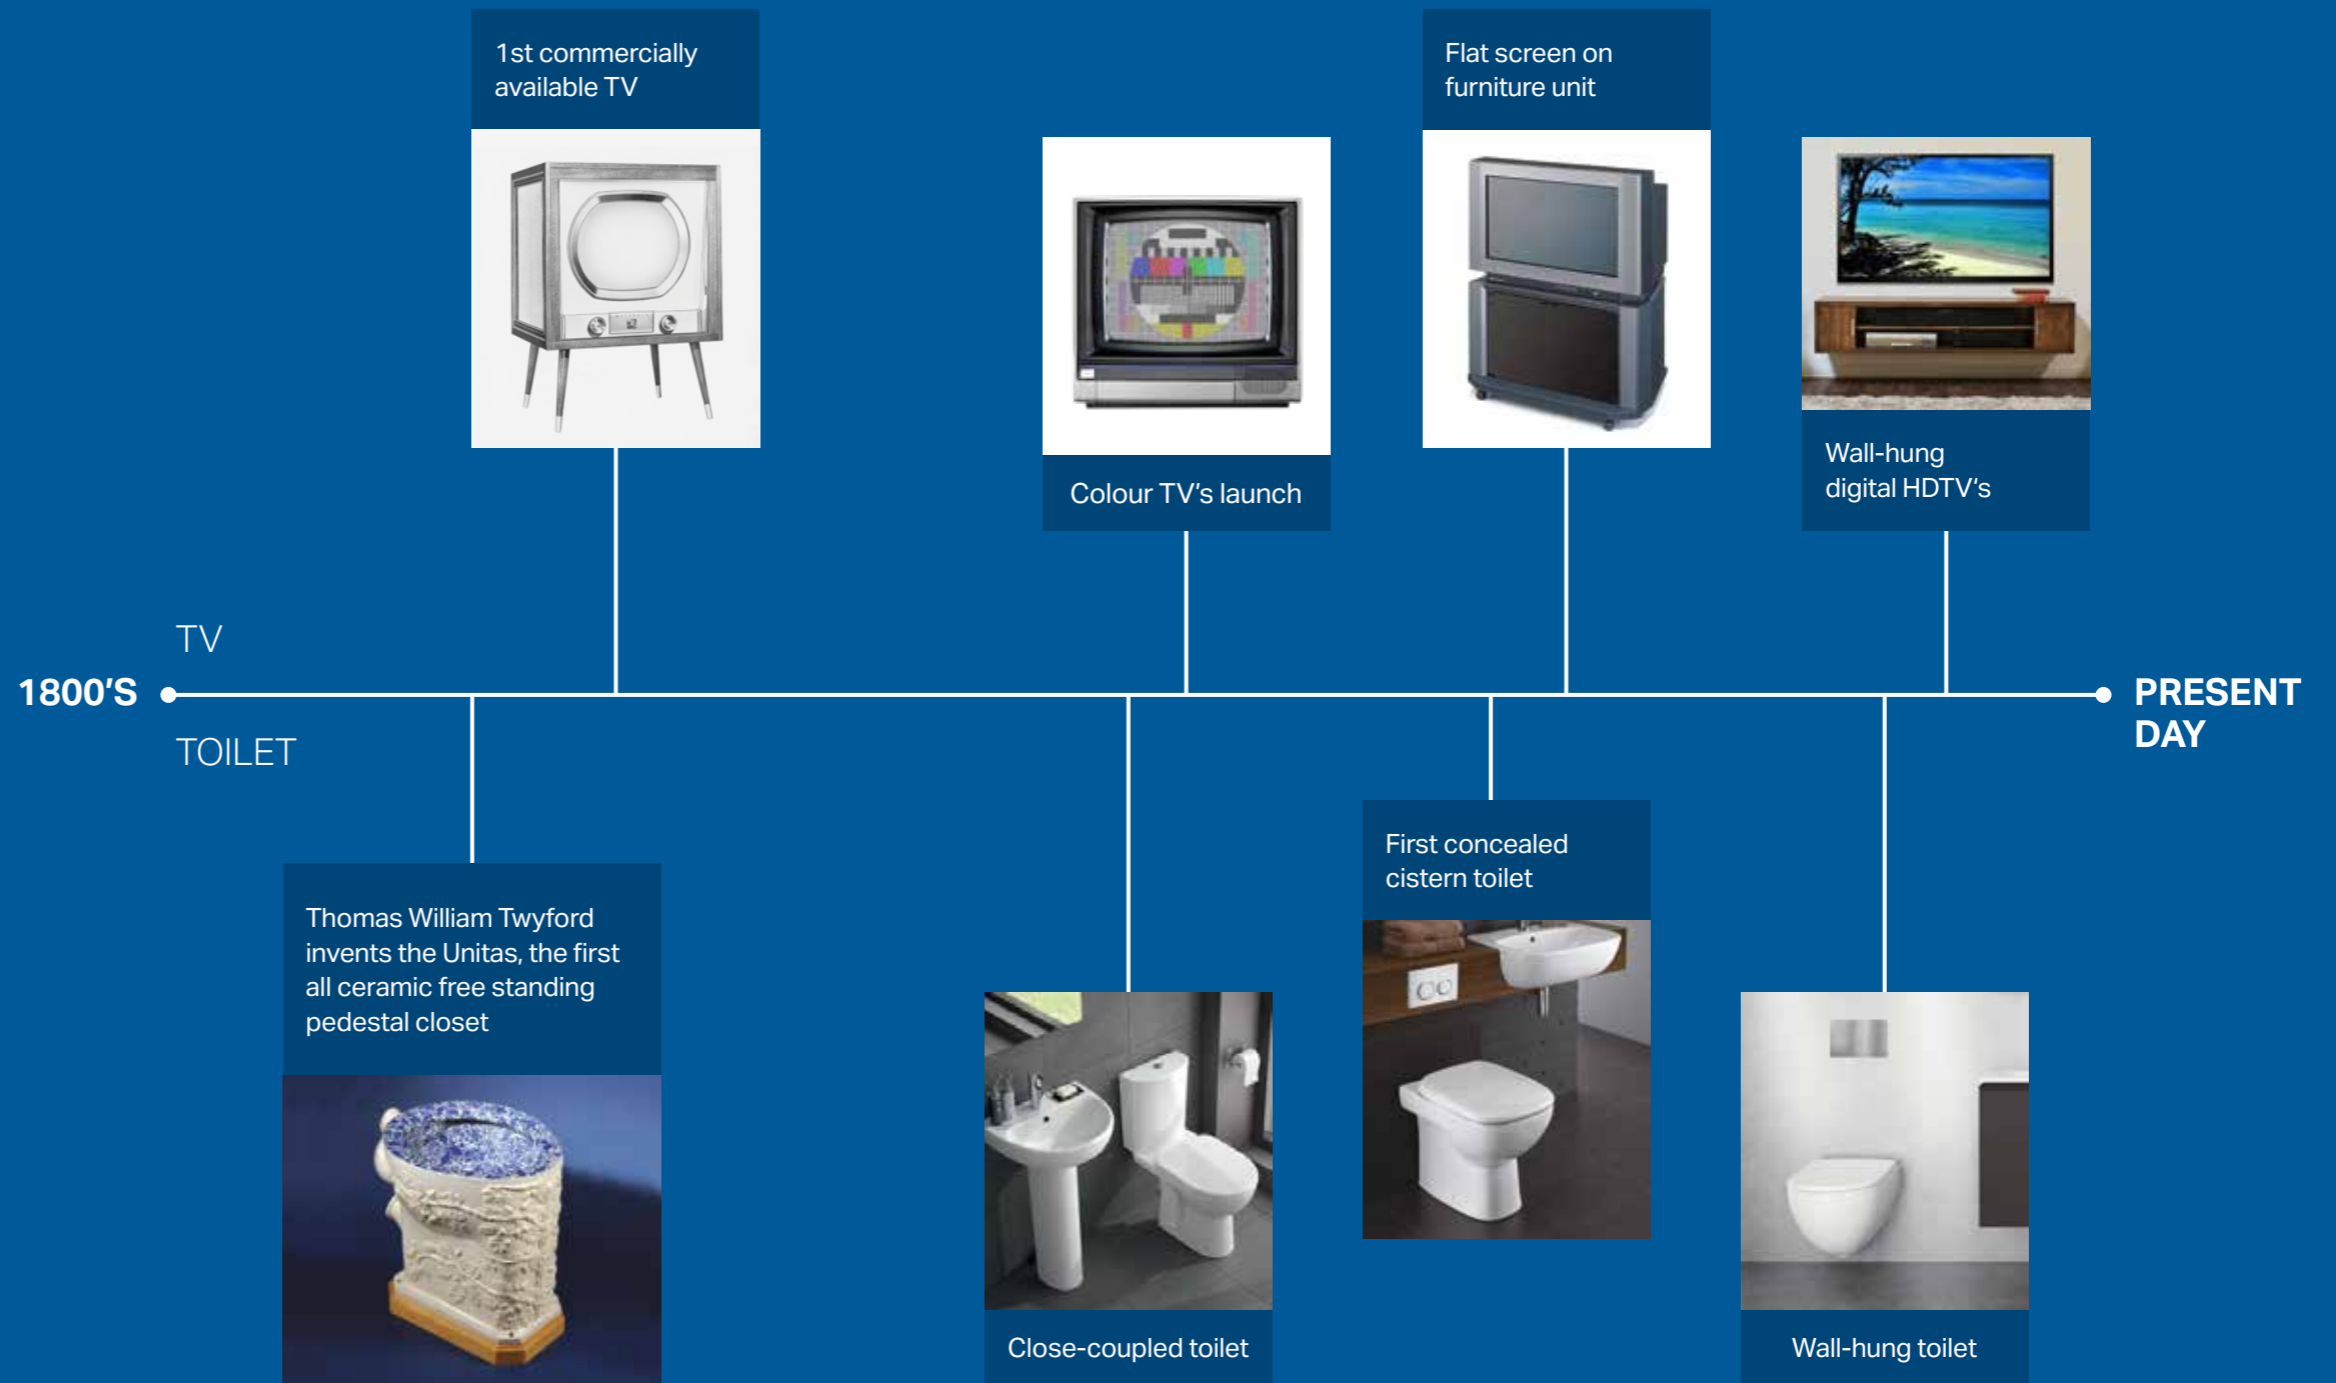

Do you remember when it was normal to pull the chain to flush a toilet? Now we are more likely to pull a lever, press a button or even wave our hand over a sensor.

Do you remember when our TVs were large, chunky and placed on a stand or cabinet. Now it's more likely to see them hung on a wall as they're so thin and the viewing quality is so much better!

Soon we'll look at our bathrooms and will feel old fashioned if we don't have our frames neatly concealed behind the wall.

Things are evolving constantly, not only technology but products within the home. The latest must have for the bathroom is a wall-hung toilet which transforms a room into a spacious and contemporary bathroom.

The concealment of wires and cables with wall-hung TV units and media walls allows for a clean and minimalist look - this is very similar to bathrooms when the installation of a concealed cistern is hidden behind the wall and is then paired with wall-hung ceramic.

# FOR ALL CIRCUMSTANCES GEBERIT DUOFIX

- Frames available in a range of heights, depths and functionalities
- Easily Installed with only four fixing points
- Fully adjustable drainage bend positioning
- Pre-wall fixing brackets and 90° bend included
- Tested to withstand 400KG of weight

→ Geberit Duofix element for wall-hung toilet, ready for installation and equipped with cistern, conduit pipes and electrical connection point for a Geberit AquaClean shower toilet.

With Geberit Duofix, the plumber and the sanitary engineer can choose from a comprehensive range of universal self supporting installation elements.

Together with the associated rails and studs, these elements can be used to create complete, statically load-bearing prewall and partition wall installations including tile-bearing panelling – and all this quickly and cleanly on site. These enable free placement of the various sanitary appliances. Room-height prewalls do not require anchoring on the back side.

# INSTALLATION TECHNOLOGY TRIED AND TESTED

Geberit Duofix provides you with a variety of design possibilities – whether it's used as a single element or in a system. The advantages of the sophisticated installation technology with infinitely variable positioning options come into full effect for everyday operations on building sites.

↑  
**SIMPLY ADJUSTABLE PIPE BRACKET**

The pipe bracket can be easily adjusted to suit the position of the connection bend by sliding to ensure tension-free installation of the connection bend. Available on Sigma and Omega.

↑  
**ALTERNATIVE POSITION FOR WALL ANCHORS**

An additional fastening hole for wall anchors to adjust their position to suit the structural conditions. Available on Sigma and Alpha 112cm.

↑  
**ADDITIONAL MARKINGS**

Markings on the blue frame make measuring easier for the centre of the threaded rod and middle of the connection bend. Available on Sigma, Omega and Alpha.

↑  
**PULL-OUT SIDE FASTENING PLATE**

Pull-out side fastening on the upper frame end for mounting on vertical studs for room-height applications. Available on Sigma 112cm.

All Geberit Duofix installation elements are prepared at the plant so that they can be installed quickly at the building site and connected with the required water supply and drainage. The work can easily be carried out by a single person. Self-tapping screws are used to fasten the element to a frame structure on a lightweight wall. Geberit provides an installation kit for direct anchoring on the building structure which you can use to comfortably set the depth adjustment from the front.

## USING SYSTEM RAIL

You can have a complete partition wall installation with tile-bearing panelling in an instant with the Geberit Duofix system rails for ceiling and floor as well as the room-height studs. You can easily fix the studs into the ceiling rail and pull them out from the bottom with a simple 90° turn. Thanks to the telescopic technology, you can do this without tools and without cutting to length. The studs are secured with a spring clip in the system rail on the floor. A swivelling head also facilitates installation with roof pitches.

↑  
Attach the Geberit Duofix acoustic insulation tape and anchor the system rails in the floor and ceiling.

↑  
Twist the Geberit Duofix studs into the ceiling rail and pull out the telescopic extension downward.

↑  
Place the Geberit Duofix installation element in the correct position. For part-height prewalls, fasten with a wall anchor. Optional extras available refer to page 51.

↑  
The Duofix element can be clicked in to the floor profile of the Duofix system with a single hand movement.

# WALL-HUNG CONCEALED ADVANTAGES

## SUSTAINABLE

A wall-hung solution needs much less cleaning agent than a floor-standing toilet. You are saving money and you are protecting the environment.

## HYGIENIC

A floor-standing toilet with an exposed cistern offers much more space that has to be cleaned than a wall-hung concealed solution. The latter has far less corners or edges where dirt, dust and hair can get stuck. Germs have nowhere to hide.

## TIME-SAVING

More hygienic does not mean that you need more time for cleaning the bathroom. On the contrary: with a wall-hung solution you clean the toilet much faster.

## CONCLUSION

Saving material and time for cleaning means: you save money. Especially in public and semi public areas like hotels or office buildings this is important.

# CONCEALED CISTERNS AT A GLANCE

## GEBERIT CONCEALED CISTERNS

- Available in various dimensions and suitable for any construction situation.
- Easy maintenance at any time through a service opening.
- Exceptional spare part security for all function-maintaining components
  - 50 years for Sigma and Omega and 25 years for Alpha.

←  
**12CM CISTERN-THICKNESS**  
In the wall or in front of the wall.  
Flushing actuation from the front.  
Choose either Sigma, Omega or  
Alpha 12cm.

←  
**8CM CISTERN-THICKNESS**  
Solution for thin wall constructions  
or for space-saving installation in  
front of the wall, flush actuation from  
the front. Choose either Sigma 8cm.

←  
**LOW-HEIGHT SITUATIONS**  
Solution for low-height installation with  
element heights 82cm, choose Omega  
(top or front access). For a height of 98cm  
go for Sigma or Alpha (front access).

Whether it be under windows or sloping roofs, in a corner or on a free-standing wall, systems and products from Geberit give you practically unlimited possibilities. Installations behind the wall lend elegance and increased space; part-height prewall installations offer additional storage possibilities.

## DRYWALL INSTALLATION

Geberit Duofix installation elements are suitable for all drywall construction situations with a drywall system. It is possible to create complete room height prewalls or partition walls.

# GEBERIT RANGE OVERVIEW

NEW

THE NEW GEBERIT DUOFIX

# SIMPLY BETTER

**FOR ANY INSTALLATION SITUATION**

Flexible adjustment options, versatile fastening methods.

**OPTIMISED HYDRAULICS**

Cisterns with the latest generation of valves.

**EASY HANDLING**

Clever installation routines for quick, simple installation.

**KNOW  
HOW  
INSTALLED**

**Flexible, simple and hydraulically optimised**

Geberit Duofix offers clear advantages as the core element of the WC System. The installation element is suitable for virtually all construction situations and is even easier to install.

## GEBERIT WASHBASIN FRAMES

### Geberit Duofix frame for washbasin, 112 - 130cm, wall-mounted tap, concealed

Art. no.	Product Description	RRP ex VAT
111.493.00.2	With PreWall brackets, backplate elbows and chrome isolating valves	£262.55
111.567.00.2	130cm washbasin, wall mounted tap with concealed function box	£480.71
111.568.00.2	130cm washbasin, wall mounted tap with concealed function box and concealed trap	£559.50

\*Available June 2025

## GEBERIT BIDET FRAMES

### Geberit Duofix frame for bidet, 82cm, Universal

Art. no.	Product Description	RRP ex VAT
111.543.00.2	With wall brackets, backplate elbows and chrome isolating valves	£478.63

### Geberit Duofix frame for washbasin, 82 - 98cm, deck-mounted tap

Art. no.	Product Description	RRP ex VAT
111.494.00.2	With PreWall brackets, backplate elbows and chrome isolating valves	£326.23

### Geberit Duofix frame for bidet, 98cm, Universal

Art. no.	Product Description	RRP ex VAT
111.544.00.2	With wall brackets, backplate elbows and chrome isolating valves	£478.63

### Geberit Duofix frame for washbasin, 112cm deck-mounted tap

Art. no.	Product Description	RRP ex VAT
111.495.00.2	With wall brackets, backplate elbows and chrome isolating valves	£280.63
111.554.00.2	Concealed trap	£394.01
111.566.00.2	Concealed function box and concealed trap	£472.84

### Geberit Duofix frame for bidet, 112cm, Universal

Art. no.	Product Description	RRP ex VAT
111.545.00.2	With wall brackets, backplate elbows and chrome isolating valves	£431.98

# ACCESSORIES AND ENHANCEMENTS

## GEBERIT FRAME ACCESSORIES

**Geberit Duofix system rail set**

Art. no.	Product Description	RRP ex VAT
111.979.00.1	2 x 3m rails. For construction of a part or full height Geberit Duofix system wall in front of a solid wall or drywall, Duofix frames fix into the rail tool free	£6.60 per metre

**Geberit Duofix stud, room-height**

Art. no.	Product Description	RRP ex VAT
111.085.00.1	220-280cm	£65.00
111.086.00.1	260-320cm	£66.56
111.087.00.1	300-360cm	£69.68
111.088.00.1	340-400cm	£71.24

For use with system rail to construct a part or full height stud wall

**Geberit Duofix stud brackets**

Art. no.	Product Description	RRP ex VAT
111.869.00.1	For fastening Duofix frames between two studs at an interval of 50-57.5cm	£31.10

**Reinforcing sheet for drywall construction, for Geberit Duofix frame for wall-hung toilet, width 50cm**

Art. no.	Product Description	RRP ex VAT
111.745.00.1	For Geberit Duofix installation frames with a width of 50 cm. For transmitting load forces to the toilet ceramic appliance through the drywall to the frame. For installation of Geberit Duofix frames for wall-hung toilet behind the wall in the installation space. For single-panelled or double-panelled drywalls made of plasterboard with or without core. For drywalls with fire protection requirements. For wall thicknesses of 3.6–10 cm.	£107.42

**Geberit drilling template for wall-hung toilet and Geberit AquaClean**

Art. no.	Product Description	RRP ex VAT
111.747.00.1	For marking the panelling cutouts for Geberit elements for wall-hung toilet. For marking the connection positions of Geberit AquaClean shower toilets	£78.20

**Geberit set of wall anchor extension rods**

Art. no.	Product Description	RRP ex VAT
111.887.00.1	For extending the Geberit Duofix wall anchors by 200-400mm	£17.39

**Geberit rear wall foot brackets**

Art. no.	Product Description	RRP ex VAT
111.064.00.1	For alternative foot fastening of the Geberit Duofix frames to the rear wall when using under floor heating or water proofing meaning you cannot drill down into the floor	£63.47

**Geberit Duofix set of wall anchors for single and system installation**

Art. no.	Product Description	RRP ex VAT
111.080.00.1	For fastening Geberit Duofix frames in front of drywalls and solid walls. For tool-free fastening of Geberit Duofix frames to Duofix system rails. For fastening panelling in part-height prewall installations. Wall inlet rotatable by 360°. Threaded rod M10, zinc-plated.	£29.90

**Geberit Duofix system fastening bracket**

Art. no.	Product Description	RRP ex VAT
111.846.00.1	For horizontal installation of Geberit Duofix system rails between Duofix studs, room-height. For creating openings in Geberit Duofix system walls for doors and mirrored cabinets.	£9.95

**Geberit s-bend**

Art. no.	Product Description	RRP ex VAT
388.350.29.1	For floor drainage where a close-coupled pan has been removed	£67.96

**Geberit connection set, eccentric**

Art. no.	Product Description	RRP ex VAT
405.116.00.1	For a raised height toilet pan. For compensating measuring discrepancies of up to 25mm.	£80.33

**Geberit HDPE straight connector with ring seal socket for wall-hung toilet**

Art. no.	Product Description	RRP ex VAT
366.887.16.1	For site drainage. For connecting sanitary appliances with horizontal outlet. For Geberit Duofix frames for wall-hung toilet.	£31.75

**Geberit Duofix set of leg supports with big foot plate, for floor construction 0-25cm**

Art. no.	Product Description	RRP ex VAT
111.849.00.3	For floor constructions 0–20cm. For use with Geberit Duofix frames for increased application of force in floors. Not suitable for Geberit Duofix frames for wall-hung toilet, 82cm, with Omega concealed cistern 12cm. Not suitable for Geberit Duofix frames for cleaner sink, 175cm. Not suitable for Geberit Duofix elements for wall-hung toilet, corner construction.	£91.07

**Geberit sound insulation set for wall-hung toilet**

Art. no.	Product Description	RRP ex VAT
156.050.00.1	For structure-borne sound insulation of toilets and bidets. For WCs and bidets with fastening distance 18 or 23cm.	£23.77

# ONE TOILET CONNECTION MANY OPTIONS

A mains connection for the toilet provides various options for more convenience in the bathroom. If it is already included during the construction phase, electrically operated functions can be installed without problems at a later stage. The Power & Connect Box from Geberit makes life significantly easier for sanitary specialists.

## A PREREQUISITE FOR ULTIMATE TOILET CONVENIENCE

An electrical connection for the toilet is a prerequisite for a variety of functions that make for a very convenient bathroom experience. A power supply is needed for odour extraction, orientation light in the night, touchless flush actuation or Geberit AquaClean shower toilets for hygienic cleaning with fresh water. Future developments could also integrate the toilet into smart home systems, so preparing power and communication connections for every toilet when fitting or renovating the bathroom is a must. Doing so ensures that it is possible to add electrical functions to the toilet area at any time.

## THE POWER & CONNECT BOX IN THE CONCEALED CISTERN

Geberit has developed the Power & Connect Box for the toilet to make it easy to install electrically operated function elements. It can be integrated into the Geberit Duofix and GIS installation elements for Sigma and Omega concealed cisterns with 12 cm installation depth and is included at the factory in some versions. The box is installed behind the ceramic appliance, invisible from the outside, and can be combined with all toilets.

- 1 Actuator plate with invisible integrated odour extraction and orientation light.
- 2 Geberit AquaClean shower toilet for gentle cleaning with water.
- 3 Touchless flush actuation with orientation light.

Modern comfort functions improve both the bathroom and quality of life. A mains connection for the toilet enables installation or retrofitting.

# A MAINS CONNECTION TO EVERY TOILET IT'S THAT SIMPLE

- Installation set: Easy prefitting for retrofitting mains connections
- Ready-to-fit set: Connection plate with power supply unit
- Clean separation of trades between sanitary specialists and electrically skilled persons

## CLEAN INTEGRATION INTO THE ELEMENT FOR WALL-HUNG TOILET

↑ The installation set and ready-to-fit set are concealed behind the ceramic appliance.

↑ A protection box ensures that the box remains clean during construction work.

The Power & Connect Box is available as an installation set and a ready-to-fit set. In all cases, the installation set should be mounted together with the installation element and fitted with the conduit pipe by an electrically qualified person. This ensures that the mains connection can be retrofitted with minimum effort.

## INSTALL THE READY-TO-FIT SET, MAKE THE CONNECTIONS

The ready-to-fit set is used when electricity is actually needed at the toilet. It consists of a connection plate, 12 volt power supply unit and a special cable. The connection plate is connected to the power supply by an electrically qualified person. All other connections are made by sanitary specialists. In this way, the Power & Connect Box creates a clean interface between trades for electrically qualified persons and sanitary specialists.

1

2

**1** Insert the connection plate into the installation set.

**2** Plug in the power supply unit.

**3** Easy connection: The plug for connecting a Geberit AquaClean shower toilet.

**4** The LED light indicates whether the power supply is working properly.

# GEBERIT DUOFRESH MODULE FRESH AIR FOR EVERYONE

The Geberit DuoFresh module extracts unpleasant odours directly from the toilet ceramic appliance. The extraction unit that accompanies it, the ceramic honeycomb filter and an orientation light can be found in an easily accessible location behind the actuator plate.

## HYGIENE OPTIONS THAT CAN ALSO BE RETROFITTED

The Geberit DuoFresh module can be integrated or retrofitted behind almost every Geberit actuator plate from the Sigma range. A sophisticated swivelling mechanism enables the plate to be moved conveniently to one side, allowing the plumber and the end user to access the honeycomb filter with ease. The installation kit includes the swivelling mechanism needed to move the actuator plate.

## ODOUR EXTRACTION UNIT WITH ORIENTATION LIGHT

The Geberit DuoFresh module removes unpleasant odours directly from the toilet ceramic appliance – extracting the air through the flush pipe and flush valve, purifying it using a ceramic honeycomb filter and then introducing the cleaned air back into the room. The module also features an LED orientation light which produces a soft glow during night-time visits to the toilet. The air extraction and light are controlled by a proximity sensor system. The installation kit for the odour extraction unit includes a swivelling mechanism for moving the actuator plate. The transformer for the power supply must be ordered separately.

## INSERT FOR GEBERIT DUOFRESH FILTER

# HYGIENIC FRESHNESS FOR WEEKS

What is standard in kitchens should also be introduced to bathrooms. The Geberit DuoFresh module provides a slot for a ceramic honeycomb filter and an orientation light that is triggered by a motion sensor. The module is easily installed and can be equipped with almost any actuator plate from the Sigma range.

↑  
It doesn't get any simpler than this:  
Move the actuator plate to one side.

↑  
Insert the filter in the slot.

↑  
Close the plate and enjoy the fresh air  
in your bathroom.

# GEBERIT MONOLITH

## MORE FLEXIBILITY IN THE BATHROOM

The Geberit Monolith sanitary module for toilet is compatible with most standard toilet ceramic appliances as well as with the Geberit AquaClean shower toilets. It is equally suitable for new building projects and renovations.  
→

Thanks to its timeless design and versatile positioning options, the Geberit Monolith sanitary module for toilet is a first-rate alternative to an exposed cistern. With its water-saving dual flush and first-class materials, even the basic model meets high demands. A new lighting concept with four dimmable lighting moods and the proven odour extraction system are integrated into the updated Geberit Monolith Plus sanitary module. All electronic functionalities can be controlled via the Geberit Home app. This also includes an interval flush, which ensures that the water pipes and the cistern are flushed regularly during longer absences. The fact that the supporting frame design is similar to the tested Geberit Duofix installation element is particularly useful for the plumber – the Geberit Monolith can therefore be anchored to the building by following a familiar procedure.

- Front cladding made of heavy-duty toughened safety glass.
- Brushed aluminium side cladding in natural or black chrome.
- Very slim with a depth of only 10 cm.
- Suitable for new construction and renovation.
- The installation is carried out according to the Geberit Duofix installation system mounting model.
- The new soft-touch buttons, integrated into the top cover for two flush quantities (Monolith Plus only), trigger the flush electronically.

### MONOLITH PLUS

# BEAUTIFUL ON THE OUTSIDE CLEVER ON THE INSIDE

The support frame design of the Geberit Monolith sanitary module for toilet is similar to the tried-and-tested Geberit Duofix installation element, which is well-known to almost all sanitary professionals. The sanitary module offers almost unlimited installation options, which is a great advantage for renovations in particular. Surrounding conditions such as skirting boards or an awkwardly positioned water supply connection no longer lead to costly adjustments, meaning there is no need to fear.

## SIDE CLADDING

Aluminium brushed

Black chrome Aluminium brushed

## FRONT CLADDING

White (SI)

Black (SJ)

Sand grey (JL)

Lava (JK)

The front cladding made of safety glass is available in the colours white, sand grey, black and lava. The aluminium brushed side cladding can be combined with white, and sand grey surfaces, while the black chrome side cladding works well with the lava and black look.

The Geberit Monolith sanitary modules offer almost unlimited installation options, which is a great advantage for renovations in particular. Thanks to the new frames and optional mounting aids, almost anything is possible.

## REMARKABLY EASY

The frame of the Geberit Monolith sanitary module for toilet can therefore be anchored to the building by following a familiar procedure.

↑ The height setting can be adjusted to the surroundings within a range of 7 cm. This does not require any special tools.

↑ The frame has two adjusting screws to compensate for any wall slants.

↑ Tried-and-tested mounting brackets are used to fasten the frame to the building structure.

↑ The reinforced braided hose for the water supply connection can be built in without having to remove the flush water tank – that's one less step.

← Geberit Monolith and Geberit Monolith Plus are available in heights of 101 cm and 114 cm.

# GEBERIT AQUACLEAN SHOWER TOILETS

**WHIRLSPRAY SHOWER TECHNOLOGY**  
With an additional shower spray, the gentle lady shower ensures personal hygiene using pure water.

**TURBOFLUSH**  
Optimised with Turbo Flush for a perfect wash-out of Geberit toilet ceramics, with water-saving flushing.

**REMOTE CONTROL**  
The intuitive remote provides hand-held control and the touch of a button is all it takes to call up personal settings.

## OUR APPROACH

Sustainability has been an integral part of Geberit's corporate strategy since 1990, with the goal of using innovative sanitary products to continuously improve people's quality of life. To achieve this, we develop sanitary products and services while taking economical, ecological and social aspects into account. As the European market leader, we want to contribute to a more sustainable sanitary industry.

## OUR KEY FOCUS

Environmentally friendly, resource-saving, durable products are extremely important at Geberit. The key here is eco-design, with all products developed consistently in line with the eco-design principle since 2007: Seen across the entire product life cycle – from the provision of raw materials to disposal – each product must be better than its predecessor from an ecological perspective, without sacrificing on quality, functionality or durability. Eco-design covers all stages of this life cycle, thus contributing to the circular economy.

Geberit, has received a Gold seal from EcoVadis in recognition of its best-in-class sustainability management. This is the second consecutive year that we have attained the Gold rating and cements the company's position as a sustainability leader within the sanitary industry.

## UP TO 50 YEARS SPARE PARTS AVAILABILITY\*

### QUALITY GUARANTEED

Geberit concealed cisterns are now classics in modern bathroom installation. The proverbial Geberit quality ensures that you can always count on clean and thorough flushing of your toilets. Our one-piece, blow-moulded cistern can be easily accessed at any time, simply remove the flush plate for quick and easy maintenance.

### PRODUCT CONFIDENCE

Due to extensive product testing Geberit offers up to 50 years spare part availability\* for all working parts within Geberit concealed cisterns and flush plates.

This gives new construction or renovation the safety and security of parts availability for years to come.

### THOROUGHLY TESTED

In the endurance testing labs, cisterns, filling valves, shower toilets, flush plates and taps are subjected to computer-controlled lifecycle testing.

150 cisterns are simultaneously evaluated at a rate of at least 200,000 flushes per cistern.

The results of short and long-term testing serve as a guideline for production release and country-specific approvals.

\*From May 2025, 25 years for Alpha, 50 years for Omega & Sigma.
