GEBERIT AQUACLEAN
THE TOILET THAT CLEANS YOU
WITH WATER

A NEW LEVEL
OF GUEST COMFORT

EXCEEDING EXPECTATIONS TRANSFORMING WELLNESS

It's time for a refreshingly different approach to guest comfort and well-being. With its inspirational Swiss design and advanced shower toilet technology, Geberit AquaClean is exceeding expectations by redefining what it means to feel really clean. A feeling of all-day freshness which is now enjoyed and increasingly expected by hotel guests all over the world. Besides elevating the customer experience, AquaClean will give your hotel a unique point of difference.

"To compete with the best as a hotelier, having shower toilets is absolutely essential."

Ernst Rieser, Hotel Rieser Aktiv & Spa Resort

←
Hotel D'Angleterre, Copenhagen, Denmark

←
CASCADA Hotel, Lucerne, Switzerland

THE HIGHEST STANDARDS OF **COMFORT AND CLEANLINESS**

In many cultures, the idea of cleaning with water is already well established. From the Far East to Western nations, more and more people are being won over by the gentle, naturally hygienic experience of a shower toilet. It's a trend which is having a direct influence on guest expectations the world over. With Geberit AquaClean you can anticipate those expectations, by delivering outstanding levels of comfort and cleanliness at the touch of a button and ensure you stand out from the competition.

Baur au Lac, Zurich, Switzerland

"Shower toilets are a factor that can really influence hotel choice. This is because guests from around the world are placing greater emphasis on personal hygiene - appreciating that fresh feeling of cleaning with water."

Thomas Bechtold
Deputy General Manager, Grand Resort Bad Ragaz

ENHANCING SPACE, INCREASING EFFICIENCY

Thanks to their simple yet sophisticated styling, Geberit AquaClean shower toilets fit elegantly and discreetly into any modern bathroom environment, bringing a myriad of benefits:

OPTIMAL ROOM DESIGN

Even in smaller bathrooms where space is at a premium, AquaClean provides an elegant solution, optimising available floor area by saving the space otherwise reserved for a bidet. Fitting seamlessly into virtually any existing or planned bathroom setting, the timeless design of our shower toilets creates a liberating sense of space whilst enhancing wellness and comfort.

SIMPLE CLEANING

Cleaning the shower toilet takes almost no time at all. In fact, it virtually cleans itself thanks to the advanced technology developed by Geberit. The special surface coating ensures that any dirt or flush water runs off completely, giving bacteria and germs nowhere to hide. The only corners and edges are in places where there is no possibility of bacteria build up.

A POWERFUL RINSE CLEAN

When it comes to flushing, AquaClean offers unrivalled performance. The innovative TurboFlush technology, coupled with the specially developed inner geometry of the Rimfree® toilet, delivers a more hygienically optimised flush. All it takes is a single water release point and a perfectly targeted water flow. This technology is not only more effective than conventional flushes, but considerably quieter and more economical. Because the flush is so thorough and efficient, it also significantly reduces the amount of cleaning required.

Perfect hygiene is also guaranteed by the Rimfree® open flush rim design, with no hidden areas where deposits can form and build up. Thanks to its efficient water guide, the entire inner surface of each ceramic appliance is rinsed clean, making our shower toilets visibly easier to care for than conventional models. The advanced flush technology also incorporates a patented flush guide, ensuring a dynamic, powerful flushing action, even on a partial flush.

SOPHISTICATED EFFICIENCY

The smart design makes every AquaClean model easy to clean and energy efficient. Because they need less cleaning and use less energy, personnel and running costs are reassuringly low.

"Shower toilets are contemporary and are a logical investment. You also save space in the bathroom."

Anja Bantle, Director, Steigenberger Drei Mohren

CLEANLINESS AT THE TOUCH OF A BUTTON

A MODEL TO FIT ANY BATHROOM REQUIREMENT

Geberit AquaClean uses the latest shower toilet technology to clean the user with a jet of warm water at the touch of a button, creating a feeling of pure cleanliness and freshness. With a range

of model options available, you can choose how many additional pampering features you wish to offer your guests. Our comfort functions include:

Toilet seat heating

The ergonomic toilet seat features integrated heating and an intelligent proximity sensor. The seat lid opens automatically and the seat begins to warm up as you approach it.

WhirlSpray shower technology

The patented WhirlSpray shower technology ensures a perfectly positioned and thorough clean, via a pulsating shower spray enhanced by dynamic aeration.

Air purification

Automatically activated, low-noise air purification eliminates odours inside the toilet.

Gentle drying

The integrated air dryer provides a gently warming and drying flow of air. The dryer arm automatically aligns itself with the last position of the spray arm, ensuring optimal drying performance.

TurboFlush technology

Specially developed by Geberit, the TurboFlush technology flushes the toilet extremely thoroughly yet also remarkably quietly, thanks to the unique inner geometry of the Rimfree® pan.

Orientation light

This discreet LED light provides soft night time illumination, activated by a proximity sensor. The light shines in one of seven pre-programmable colours, with five levels of brightness.

Intuitive remote control

Both the remote control and wall-mounted control panel can be used to operate the shower toilet. These two operating modes clearly display available functions, enabling easy use. The elegant and intuitive hand-held remote provides intelligent touch control, while the cable-free wall-mounted panel can be screwed or glued anywhere on the wall, so it can't be stolen or removed.

AquaClean app

The new Geberit AquaClean app makes operating the shower toilet simple and straightforward. As well as a remote-control function, the app boasts a variety of other setting options. For instance, users can take their personal settings on their travels and use them on other AquaClean shower toilets anywhere in the world.

GEBERIT AQUACLEAN MERA EXCEPTIONALLY BRILLIANT

gloss chrome

white

The Geberit AquaClean Mera displays an impressive array of revolutionary comfort functions. Like the patented WhirlSpray shower technology which saves water whilst providing a particularly thorough and gentle clean and the hybrid hot water system which provides an immediate, continuous supply of hot water.

A further highlight is the Rimfree® ceramic. It forms the basis for the innovative TurboFlush technology, which flushes exceptionally thoroughly yet quietly, meaning no disturbances from neighbouring rooms throughout the night.

The AquaClean Mera is available in the Classic and Comfort models. Even the AquaClean Mera Classic is equipped with a complete and impressive range of innovative features. These include integrated air purification, intelligent warm air dryer and user-friendly remote control which allows users to operate multiple functions in an intuitive way to suit personal preference. The Comfort model also comes with a discreet light to guide night-time bathroom users, a toilet lid that opens and closes automatically and welcoming seat heating.

-  WhirlSpray shower technology with five adjustable shower pressure settings
-  Rimfree® ceramic pan with TurboFlush technology
-  Intuitive and clearly laid-out remote control
-  Remote control app
-  Orientation light in a range of colours (only available on the AquaClean Mera Comfort)
-  Individually adjustable spray arm position
-  Adjustable water spray temperature
-  Oscillating spray
-  Gently cleaning lady wash
-  Toilet seat heating (only available on the AquaClean Mera Comfort)
-  Dryer
-  Odour extraction
-  Touchless automatic mechanism for the toilet lid (only available on the AquaClean Mera Comfort)
-  QuickRelease function for the toilet lid and seat
-  User detection
-  Descaling function
-  Energy-saving function

GEBERIT AQUACLEAN SELA

BEAUTIFULLY CLEVER

floor standing

wall-hung

The Geberit AquaClean Sela is an impressively streamlined shower toilet combining easy-to-use features with conventional toilet design. The patented WhirlSpray shower technology ensures a precisely targeted, thorough clean. The spray intensity can be adjusted to one of five levels. All power and water supply connections and intelligent spray functionality are integrated into the ceramic appliance, rendering them invisible. AquaClean Sela is available as a wall-hung or a floor-standing solution to suit any hotel bathroom. Both versions come with a remote control and an impressively ergonomic and exceptionally comfortable seat.

-  WhirlSpray shower technology with five adjustable shower pressure settings
-  Intuitive and clearly laid-out remote control
-  Individually adjustable spray arm position
-  Oscillating spray
-  SoftClosing and SoftOpening function
-  QuickRelease function for the toilet lid and seat
-  User detection
-  Energy-saving function

GEBERIT AQUACLEAN TUMA

SURPRISINGLY VERSATILE

complete solution

enhancement solution

The Geberit AquaClean Tuma packs lifestyle innovations into its compact form, optimising space in any hotel en-suite. A simple yet elegant design with sophisticated smart technology, its bathroom-transforming features include patented WhirlSpray shower technology, Rimfree® pan, heated seat, touchless drying and integrated air purification. And the best part is, your hotel guests control it all, via user-specific settings on the remote which provides for easy adjustment of the spray arm, oscillation and spray intensity. AquaClean Tuma is available as a complete solution with a perfectly matching ceramic appliance and concealed power and water supply connections. Or as an alternative toilet enhancement option for hotel refurbishments and re-designs, it can be retrofitted to pre-installed ceramics with the same functions as our complete solution for the same overall clean feeling.

The AquaClean Tuma is available in the Classic and Comfort models with the Classic model simply having more streamlined features.

-  WhirlSpray shower technology with five adjustable shower pressure settings
-  Rimfree® toilet ceramic appliance
-  Intuitive and clearly laid-out remote control
-  Remote control app
-  Individually adjustable spray arm position
-  Oscillating spray
-  Gently cleaning lady wash
-  Toilet seat heating
-  Dryer
-  Odour extraction
-  SoftClosing function
-  QuickRelease function for the toilet lid and seat
-  User detection
-  Descaling function
-  Energy-saving function

WITH AQUACLEAN, IT'S ALL SO EASY. SIMPLE INSTALLATION SOLUTIONS FOR ANY LOCATION

We've applied Geberit thinking to every construction scenario, so wherever you want to fit AquaClean we've thought of everything. All you need are water and power connections.

Geberit toilet installation

With Geberit AquaClean, any hotel bathroom can be transformed into an oasis of well-being in no time at all. Whether it's a new construction project or a complete renovation, our new toilet installation frames with concealed cistern provide a completely reliable solution. Since all the necessary connections have already been planned in, all AquaClean shower toilets can be installed and linked up to the power and water supply without any problems. We also offer a simple supplementary set for built-in toilets without the required connection positions for power and water. In this case, the water supply connection and possibly also the electrical connection will remain visible.

Geberit Monolith sanitary module

To ensure quick and easy installation, Geberit also offers the multiple-award winning, aesthetically advanced Monolith sanitary module. If there is already a cistern in front of the wall or it is just not possible to conceal the cistern inside the wall due to time, construction or budgetary constraints, the Monolith offers a perfect alternative. Hidden beneath an elegant glass surface is an ultra-slim cistern and all the required sanitary technology. The Monolith is designed for quick and easy mounting and can be connected to existing water supply lines and discharge pipes. Ideally, the installer will have already earmarked a power socket by the shower toilet for setting up the necessary mains connection. If required, the shower toilet can also be connected to the power supply anywhere in the bathroom via a conventional power socket and a cable duct.

The Geberit Monolith Plus version offers additional comfort features. These include advanced air purification with a long-lasting ceramic honeycomb filter, an individually programmable LED orientation light and soft-touch operating buttons. Monolith Plus is particularly suitable as an upgrade for a floor-standing AquaClean Sela shower toilet. With matching Monolith sanitary modules also available for washbasins, bathrooms can be upgraded and modernised to harmonise with your new design vision.

The Geberit Monolith Plus version offers extra comfort features, including effective odour extraction with a long-lasting ceramic honeycomb filter, an individually programmable LED orientation light and soft-touch operating buttons. This model is particularly suitable as an upgrade for a floor-standing Geberit AquaClean Sela shower toilet. With matching Geberit Monolith sanitary modules for washbasins available, bathrooms can be furnished in a thoroughly modern style, creating a harmonious look.

“Globalisation has meant that in the hotel industry the expectations of luxury and comfort are now identical across the world.”

Ray Iunius
Head of Business Development & Marketing, Ecole hôtelière de Lausanne

Shower toilets, the new essential

The Swiss technology behind Geberit AquaClean is transforming guest experiences across the globe. Which explains why so many guests seek to replicate the AquaClean experience when they return home. For many, it's the new essential; the difference between feeling reasonably clean and really clean.

It's no surprise that some of the world's most prestigious hotels are now looking to AquaClean to meet their guests' ever-increasing expectations. Hotels like the Dorchester and the Corinthia in London, Coworth Park in Ascot, the Buddha Bar in Prague, the Victoria-Jungfrau Grand in Interlaken, the Grand Resort Bad Ragaz, the Hilton and the Trois Rois Grand in Basel. When will your hotel join this growing list?

Picture your hotel, transformed with the Geberit Bathroom Collection

The new Geberit Bathroom Collection is reimagining the bathroom space as never before. As a European leader in bathroom innovation, we've combined Swiss ingenuity with the vision of today's leading designers to create five stunning new ceramic ranges.

Our new designs complement the Geberit AquaClean range perfectly, turning the modern bathroom space into an oasis of calm where guests can relax, refresh, and take a step back from the world. Enhancing guest experiences with new style, well-being and smart technologies.

SUSTAINABLE PRODUCTS FOR SUSTAINABLE CONSTRUCTION

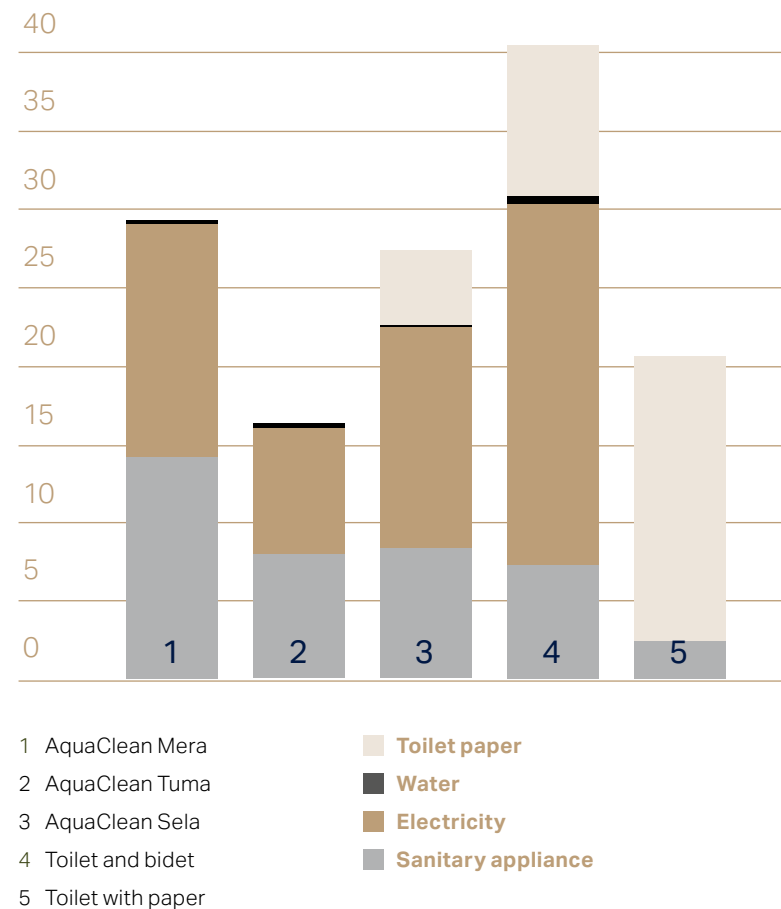

At Geberit, everything we do anticipates future needs. As part of our long-term commitment to future generations, every product is purpose-designed and carefully considered. We regularly score top marks when it comes to sustainability, underlining the importance we attach to environmentally friendly production techniques.

During development, products such as Geberit AquaClean are subject to ongoing optimisation in terms of environmental compatibility, efficient use of resources and durability throughout the entire lifecycle.

Our complete shower toilet solutions have a positive environmental footprint in relation to conventional toilets and the use of toilet paper. Compared to the amount of paper consumed by traditional toilets, the additional water used is relatively negligible, especially when the processing and electricity costs of manufacturing toilet paper are factored in. On all AquaClean products, additional energy savings can also be realised through individual settings, further reducing environmental pollution.

Geberit AquaClean shower toilets in comparison with conventional toilets with toilet paper and bidets.

Assumption: two guests per day, at 85% capacity, renovation every 15 years.

The graph shows the environmental impact estimated using the IMPACT World* method.

AQUACLEAN ADVANTAGES AT A GLANCE

There's nothing quite like the feeling of cleaning with water every time you go to the toilet. And there's nothing quite like the pioneering innovation of Geberit AquaClean. Here's how our shower toilet design and functionality is adding value right across the hotel sector:

- Simple, hygienic cleaning
- Intuitive, user-friendly operation
- Reliable technology and high-quality materials, ensuring a long service life
- Connections for water and electricity can be integrated, making them invisible
- Low energy and water consumption
- Easy maintenance, with associated cost reductions
- Ten years' guaranteed spare parts availability for all components
- Full compliance with all relevant European regulations and Standards

By installing Geberit AquaClean, you will:

- Add an innovative product to your hotel design
- Meet your guests' increasing hygiene requirements
- Optimise the layout of your bathrooms
- Stand out from your competitors
- Make an investment that pays off in the long-term

PERFECT SERVICE

With comprehensive guarantees, support and servicing, the operation and maintenance of Geberit shower toilets are guaranteed at all times:

- Technical advice and support at all levels
- Comprehensive information and multilingual operating instructions for your guests
- Wide range of training available for cleaners, building services and staff
- Servicing packages tailored to your requirements
