MOISTURE-RESISTANT

DURABLE AND RELIABLE

Geberit bathroom furniture is produced using high-quality and moisture-resistant wood based panels. Medium-density fibreboard (MDF) is used, as well as high-density chipboard, which prevents moisture damage.

STANDARD MATERIAL

Absorbs moisture like a sponge.

MOISTURE-RESISTANT MATERIAL

Wood based panels designed for places with high humidity.

Clever details such as well-positioned profile handles, push-to-open drawers and easy-glide rails make Geberit bathroom furniture a joy to use.

SIX GOOD REASONS

WALL-HUNG TOILET SOLUTIONS

VERY STRONG

No wobbling or vibrations - strength-tested to bear a weight of up to 63 stone.

DURABLE

Installed 60 million times over the past 50 years, Geberit concealed flush plates represent the ultimate tried-and-tested solution.

HYGIENE: SIMPLE CLEANING

No pedestal and no cistern in front of the wall means no exposed pipework for dirt and bacteria to hide.

SIMPLE MAINTENANCE

Simply remove the flush plate for access to all important parts. Geberit stock spare parts for 25 years.

TESTED IMPERMEABILITY

Every Geberit cistern is individually tested to guarantee water tightness.

ACOUSTICS SOLUTIONS

Acoustic solutions with the Duofix frame mean it's all quiet behind the scenes.

Wall-hung toilets give bathrooms a neat and tidy appearance and make cleaning the floor easier. They have been a standard feature in modern bathrooms for decades and have proven their worth in millions of installations.

GEBERIT RIMFREE® SOLUTIONS

PERFECTLY CLEAN WITHOUT ANY EFFORT

In addition to design, hygiene and ease of cleaning are important factors when choosing a toilet. Traditional flush rims attract germs, dirt and deposits.

Geberit has introduced Rimfree® technology; a completely new and patented flushing system that ensures a deeper level of cleaning.

The flow of water is controlled just before it reaches the ceramic pan. A flush guide sends the water stream along both sides to the exact area where it is needed for a clean and thorough flush.

INNOVATIVE FLUSH TECHNOLOGY

Geberit Rimfree® toilets are equipped with a specially developed and patented flush guide which ensures a targeted and hygienic flush every time.

↑ Common toilet pans depend on a flush rim which cannot easily be cleaned. Dirt and bacteria accumulate in this difficult to reach place.

↑ With Geberit Rimfree® technology however, there is no rim. The smooth inner surface of a Geberit Rimfree® toilet pan is cleaned with one swipe. And best of all, you can see immediately if all dirt has been removed.

INNOVATIVE ODOUR EXTRACTION AND AIR PURIFICATION

GEBERIT ODOUR EXTRACTION

Lingering odours can turn your visit to the bathroom into an unpleasant experience. 92% of people believe that our mood is influenced by scent. Air fresheners only mask unpleasant odours whilst opening windows can leave the bathroom cold and unwelcoming.

The innovative extraction of odours from the toilet can be achieved with a variety of solutions:

- Geberit DuoFresh – the odour extraction unit behind the flush plate
- With the sanitary module Geberit Monolith Plus
- Various Geberit AquaClean shower toilets

GEBERIT SMYLE WASHBASINS

LIGHTWEIGHT IN APPEARANCE, THE GEBERIT SMYLE SERIES STANDS OUT IN ANY MODERN BATHROOM

Sophisticated lines, harmonious shapes and narrow rims on the washbasins appear in exciting contrast to the generous shelf surfaces. Whether large or small, with or without a tap hole, in various widths; as a double washbasin or handrinse basin, Geberit Smyle offers ideal solutions for all requirements in modern bathrooms.

1 A spacious double washbasin with a flowing basin design and Slim Rims. **2** An extensive bathroom furniture range with attractive surfaces. **3** Integrated lighting elements in the mirror cabinet help the washbasin area take centre stage.

GEBERIT SMYLE BATHROOM FURNITURE

MORE DESIGN FREEDOM IN THE BATHROOM

As part of the facelift given to the Smyle bathroom series, Geberit adapted the furniture to the form and concept of the ceramic sanitary appliances. To achieve this, the furniture concept features thin washbasin contours. As is standard at Geberit, high-quality materials, coated surfaces and modular elements are used in order to achieve a high degree of flexibility. The washbasin cabinets, low cabinet, tall cabinet, shelf element and wall shelf with towel hook can be mixed and matched to create a wide range of furniture combinations that optimally use the space in the bathroom.

Depending on requirements, open cabinets can also be combined with closed ones, for example. The furniture is equipped with several surprising and useful features. Additionally available drawer inserts give the storage space a clear structure. Glass shelves and an internal mirror give the tall cabinets a touch of premium class. Colour-adapted glass tops protect the shelf surfaces on the low cabinets. The integrated profile handles have the same colour as the fronts of the furniture, with their matt surface and ornate lines forming a subtle contrast.

The Geberit PushControl waste and overflow is the perfect addition, with the slim design matching the outstanding comfort of the bath.

GEBERIT VARIFORM

The Geberit VariForm design concept is based on the four basic geometric shapes – round, rectangle, oval and ellipse, using them to create new and different variations every time. It's a concept that opens up a whole host of possibilities for customising bathroom designs. The washbasins offer an almost endless range of design options.

1 Lay-on washbasins with gently rounded elliptic shape, combined with wall-mounted taps.
2 Lay-on washbasins with clean rectangular geometric shape, with deck-mounted taps on base panel.

GEBERIT VARIFORM MODERN WASHBASINS

THE LATEST DESIGN TRENDS – MADE VERSATILE AND ERGONOMIC

The streamlined rims of Geberit VariForm washbasins are the perfect match for cutting-edge bathroom designs. Countertop and lay-on washbasins are available both with and without a tap hole bench. The tap can be installed as a deck-mounted tap on the ceramic or the base panel – or alternatively, as a wall-mounted tap on the prewall installation. All Geberit VariForm models feature a generous basin depth to ensure freedom of movement in ergonomic conditions. Made from high-quality sanitary ceramic, the washbasins are scratchproof and resistant to cracks, as well as easy to care for.

GEBERIT SHOWER SOLUTIONS

Today, floor-even showers are an important part of discerning, comfortable bathrooms – they offer considerably more comfort and simply look better. And thanks to clever technical solutions, they are also easy and safe to install. The shower of today.

GEBERIT SHOWER SURFACE SETAPLANO

The Geberit Setaplano shower surface is a captivating product from the very first glance - and the very first touch. Made of a high-quality solid surface material, it has a surface that feels silky-smooth and warm to the touch.

The Geberit Setaplano is made of a high quality solid surface material. You can really feel the difference as the smooth matt surface is particularly pleasant to the touch and radiates a sense of luxury. The surface material is noticeably solid, and its non-slip properties provide more safety. The gentle incline with the soft and seamless transition to the outlet at the front end contributes to the harmonious overall appearance.

The Geberit Setaplano surface is very robust, easy to clean and hygienic. The material is also very forgiving – small defects and scratches can be easily buffed out. The edgeless inlet area in which no dirt can accumulate is also easy to clean, as is the comb insert that can be removed and cleaned effortlessly.

The substructure of the shower surface makes use of innovative system technology that makes your plumber's job easier and provides you with peace of mind that installation will be quick and cost-efficient. The system is already sealed perfectly in the factory and will remain so over the long term in your bathroom.

1 The cover of the shower drain at the front end can be removed effortlessly. **2** A comb insert below the cover prevents clogging. It can be easily removed and cleaned in next to no time.

GEBERIT SHOWER CHANNELS CLEANLINE

HYGIENIC, CLEAN AND SIMPLY BEAUTIFUL:
GEBERIT SHOWER CHANNELS FROM THE
CLEANLINE SERIES FOR FLEXIBLE
BATHROOM DESIGN

Geberit CleanLine breaks new ground in shower drainage. It does not discharge the water invisibly in a channel, but instead via elegant stainless steel collector profiles. There are no hidden areas meaning that dirt is prevented from accumulating and leading to unpleasant odours. Simply wipe over the profile once and everything is clean.

Geberit CleanLine is considerably more flexible than many other shower drainage solutions as the collector profile can be simply cut at both ends and adjusted to the nearest millimetre, depending on the room conditions.

Geberit CleanLine is available in three different designs. **1** Geberit CleanLine20 channel. **2** Geberit CleanLine60 channel. **3** A comb insert prevents clogging and is easy to remove, and easy to clean. **4** Also available in a customisable version for tiles.

GEBERIT WALL DRAIN FOR SHOWERS

TAKING THE FLOOR-EVEN SHOWER A STEP FURTHER

The Geberit wall drain shifts the drainage of floor-even showers from the floor to behind the wall. Not only does this look very attractive, it also makes it easier to install a floor-even shower. Both the drinking water and waste water installations are behind the wall and the floor can be tiled throughout. This also makes it possible to install underfloor heating without interruption.

All that remains visible is a small cover on the wall that can be easily removed to clean the comb insert behind. The cover is available in various surface finishes and can also be tiled to match the design of the wall.

1 Discreet and very easy to clean. 2 The wall drain cover can also be tiled to match the bathroom design.

QUIET

A quiet fan transfers the purified air back into the room.

What is long since standard over every kitchen oven can now be applied in the bathroom. An effective way to get rid of unpleasant odours, the Geberit DuoFresh module removes the bad air directly from the toilet, purifies it using a ceramic honey comb filter, and then returns it to the room. This is extremely effective as it prevents unpleasant odours from spreading throughout the bathroom. Thanks to a proximity sensor, the odour extraction always switches on automatically, as soon as someone sits down. Benefit from additional comfort thanks to an LED orientation light and the insert for in-cistern sticks. The Geberit DuoFresh module can be easily installed in any Geberit Sigma cistern and can be combined with almost any flush plate from the Sigma Range.

CREATING THE FUTURE

Sustainable operations. The opportunities for tomorrow depend on how we act today. For Geberit, this means acting with reason and vision, with innovations that assume responsibility for generations to come and actively promote our environment.

ENVIRONMENTALLY FRIENDLY PRODUCTS

Geberit's ceramic sanitary appliances protect the environment and resources in several respects. The toilet can be flushed with low flush volumes and therefore save water, while the surfaces are easy to keep clean and save on cleaning agents. The KeraTect® special glaze is particularly easy to clean.

Geberit ceramic sanitary appliances are 100% recyclable. They consist largely of the natural minerals quartz, feldspar, clay and kaolin. The glaze is 100% lead-free.

PRONOUNCED QUALITY AWARENESS

Geberit products are carefully developed for long-term use. Thorough function tests, load tests, digital measurements and TÜV-certified safety all ensure technical reliability, comfort and future-proof solutions. Geberit was the first bathroom ceramics manufacturer in Europe to receive DIN EN ISO 9001 certification for outstanding quality management.

OPTIMISED PRODUCTION AND LOGISTICS

Back in 1994, Geberit became the first company in the sanitary ceramics industry to be awarded the TÜV environmental management certificate for energy-saving and environmentally friendly production processes. The company continuously works to achieve further improvements across the entire production and logistics chain.
