

GEBERIT BIM PLUG-IN

NEW FUNCTIONS, REVISED FEATURES AND NEW PRODUCTS

RELEASE APRIL 2025

A maintenance update for the Geberit BIM plug-in is now available for download. Plug-in users will be notified by a pop-up message directly in the software that a new version is available. In this newsletter we will give you an overview of the new functions, features and products.

NEWS IN THE CATALOGUE MODULE

GEBERIT SILENT-DB20 SUPERTUBE AVAILABLE

Geberit will launch fittings with SuperTube technology for the highly sound insulated system, Geberit Silent-db20 for the use in high rise buildings. With the new release you will find the BIM content for these fittings in the catalogue.

TWYFORD CATALOGUE ADDED TO MARKET ASSORTMENT

Users in the UK can now find Twyford products in the catalogue.

THE NEW GEBERIT DUOFIX INSTALLATION SYSTEM AVAILABLE

The BIM content for the new Geberit Duofix installation systems and elements is now available in the catalogue.

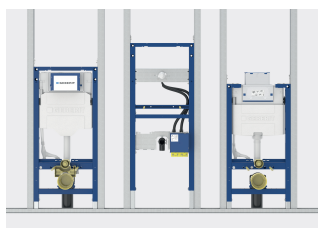

NEWS IN THE PLUVIA MODULE

CALCULATION WAITING TIME REDUCED

Users of the Geberit BIM Plug-in Pluvia module will benefit from faster dimensioning times when modifying diameters for calculations. Isometrics will now be generated only when creating reports.

NEWS IN THE INSTALLATION MODULE

EASIER TO SELECT THE INSTALLATION ELEMENTS

When planning a prewall installation system, start by selecting your preferred Geberit installation system—either Geberit GIS or Geberit Duofix. The tool will then display only the relevant elements for your chosen system, making it easier to find the right components and reducing the risk of calculation errors.
