

GEBERIT PROPLANNER

LATEST FUNCTIONS & IMPROVED FEATURES

OCTOBER 2025

A maintenance update for the Geberit ProPlanner is now available for download. Users will be notified by a pop-up message directly in the software that a new version is available.

GENERAL MODULE HIGHLIGHTS

ONE-CLICK EXPORT OF SEPERATE PDF OR EXCEL FILE

Project lists can now be exported as individual documents with a single click. This removes time-consuming manual steps and speeds up the delivery of client-ready lists.

ROOF DRAINAGE SYSTEMS

INCREASED USER FLEXIBILITY

Material lists can now be generated for specific sections only, supporting renovation projects where only parts of the installation need to be added.

Project number: RDS 2021			Page 1 / 2	GEBERIT
Project name: Sample Solution Roof Drainage Systems (AU)			Date: 9/29/2025 12:16:26 PM	
Project description:			Person responsible:	
Material list (Subsystem calculation)				Roof drainage systems
Quantity				Article designation
Roof outlets				
5 pcs	359.111.00.1			Pluvia gutter outlet 12L/s
Pipes				
9.5 m	361.000.16.0	HOPE pipe da. 38mm		
23.8 m	363.000.16.0	HOPE pipe da. 56mm		
9.5 m	364.000.16.0	HOPE pipe da. 63mm (length5m)		
12.0 m	365.000.16.0	HOPE pipe da. 76mm (length5m)		

FLEXIBLE PLACEMENT OF PUPE REDUCTION

Reductions can be positioned directly after an outlet on vertical or horizontal pipes. This increases accuracy in material lists and reduces manual adjustments in space-constrained layouts.

MORE PRECISE FASTENING MATERAIL LISTS WITH BUILDINGS STRUCTURE DISTANCES

By defining structure distances on a pipe level, fastening material lists become more accurate. Threaded rod calculations and cutting lengths are optimized, leading to more efficient planning.

DETAILED PLANNING 3D

SWITCH BETWEEN GEBERIT GIS AND GEBERIT DUOFIX WALLS WITH ONE CLICK

Walls can be changed between GIS and Duofix without redrawing, saving time and increasing flexibility in projects.

DIMENSION SPLINES IN ELEVATIONS

Splines representing bendable pipes can now be dimensioned in 2D elevation drawings, improving workflow efficiency.

ALIGN TOOL FOR WALL LAYOUTS

Objects can now be aligned along the same axis. This reduces manual adjustments and improves accuracy in wall layouts.

EXTENDED TYPES FOR PRIMITIVE LINES AND SHAPES

New line types are available across Detail Planning 3D and Schematic Planning. This expands options for labels, notes, and highlights in project plans.

WASTER WATER PREFABRICATION

GRAPHICAL CUTTING LIST INTEGRATED INTO BILL OF MATERIAL

Cutting lists for wastewater pipes are now shown graphically and included in the Bill of Materials. This supports efficient material usage, reduces costs, and minimizes waste.

INSTALLATION SYSTEMS

MULTISELECT COPY/PASTE BETWEEN PROJECTS

Multiple items and positions can now be copied and pasted between projects or sub-projects. This speeds up workflows and improves project organization.
